Product Designer and Design Engineer

Designer who ships the front end. 5+ years on 0-to-1 healthcare, AI, and enterprise SaaS products, taken into production in React, TypeScript, and Cloudflare Workers rather than handed off as a Figma file. Most of it is clinical and enterprise work where the hard part is making a wall of data legible.

EXPERIENCE

CodeBuddy | Product Designer | Pune

Feb 2025 – May 2026

Design and front-end work across seven client products in healthcare, security, creator economy, and enterprise SaaS, including 7+ production Framer sites.

- Owned both design and front-end engineering for **Proposal Buddy**, shipping the live product in React, TypeScript, Tailwind, and Cloudflare Workers.
- Sole designer on **N1 Care**, an AI clinical platform built by a team of 23, then built its React page layouts and templates alongside engineering.
- Built N1 Care's **80+ component design system** and implemented it in code with engineering using Claude Code and the Figma MCP, keeping one token set across Figma and the repo.
- Prototyped **45 clinical data visualisations** in HTML, SVG, and ApexCharts so engineering could validate chart behaviour against real data before picking a library.

Duggup | Founding Product Designer | Bangalore (Remote)

Feb 2023 – Jan 2025

- Founding and only designer for **Duggup** web and mobile. Shipped version 1.0 in five months and **2,000+ signed up in the first week**.
- Built one cross-platform design system rather than two, halving redesign and testing time.
- Instrumented activation and retention in Amplitude and A/B tested the weakest steps with engineering.

Consult Anubhav | UX Designer | Vadodara

Jun 2022 – Jun 2023

- Led design for Draftsy, a real-time fantasy sports app for BREN LLC. Interviews showed drafts stalled on timed turns, and the auto-pick design that followed lifted engagement 20%. Part-time from Feb 2023, alongside the founding role at Duggup.

Freelance | Product and Brand Designer | Vadodara (Remote)

Mar 2021 – May 2022

- Rebuilt Baroda Public School's learning platform, lifting student interaction 35% and course completion 20%.

SELECTED BUILDS

Pickle Royale 2v2 pickleball rankings with a custom Elo engine. React, Workers, D1.

pickleball.dhrumilkherde.com

Tinct Design token studio that generates and exports accessible colour systems.
