Product Designer

Product designer with 5+ years on 0-to-1 healthcare, AI, and enterprise SaaS products. I own research, interaction design, and design systems, and I build the front end in React and TypeScript when shipping it myself is faster. Most of my work is making complicated clinical and enterprise workflows simple enough to act on.

EXPERIENCE

CodeBuddy | Product Designer | Pune

Feb 2025 – May 2026

Product design across seven client products in healthcare, security, creator economy, and enterprise SaaS, including Expand Health's four-score longevity triage.

- Sole designer on N1 Care, an AI clinical intelligence platform built by a team of 23, across 10 product areas. An internal clinician review measured **75% less analysis and report time**.
- Built its **80+ component design system** and a 28-point checklist deciding when AI-generated report content needs a clinician to sign off.
- Reframed Riskabilitie, an enterprise risk platform, around permission-aware views after workshops showed executives and risk owners needed different reads of one assessment.
- Owned design and front-end engineering for Proposal Buddy, shipping it live in React, TypeScript, and Cloudflare Workers, plus 7+ production Framer sites.

Duggup | Founding Product Designer | Bangalore (Remote)

Feb 2023 – Jan 2025

- Founding and only designer for Duggup web and mobile. Shipped version 1.0 in five months and **2,000+ signed up in the first week**.
- Built one cross-platform design system rather than two, halving redesign and testing time.
- Designed contribution, search, challenge, and event-purchase flows, then tracked activation and retention in Amplitude and A/B tested the weakest steps.

Consult Anubhav | UX Designer | Vadodara

Jun 2022 – Jun 2023

- Led design for Draftsy, a fantasy sports app for BREN LLC. Interviews showed drafts stalled on timed turns, and the auto-pick design that followed lifted engagement **20%**.
- Ran a team of three designers across food delivery, logistics, and enterprise survey products. Part-time from Feb 2023, alongside the founding role at Duggup.

Healthplix Technologies | UX Design Intern | Bangalore (Remote)

Apr 2022 – Jun 2022

- Expanded the design system with 26 components and variants, and designed the admin and campaign tools marketing ran on.

Freelance | Product and Brand Designer | Vadodara (Remote)

Mar 2021 – May 2022

- Rebuilt Baroda Public School's learning platform, lifting student interaction **35%** and course completion **20%**.

EDUCATION

SVIT (Gujarat Technological University) Bachelor of Engineering, Mechanical Engineering, Vasad, Gujarat

May 2022

AWARDS AND ACHIEVEMENTS

Top 50 Rising Designers Upraised, Embark. Top 50 of 455,534 students across 20,000+ colleges.
