Product Designer

Product Designer with 5+ years taking 0-to-1 healthcare, AI, and enterprise SaaS products from discovery to production. I lead research, interaction design, design systems, prototyping, and usability testing, then work closely with engineers or build the front end in React, TypeScript, and Framer. My focus is making complex, high-stakes workflows clear and ready to ship.

EXPERIENCE

CodeBuddy, Product Designer Pune

Feb 2025 to May 2026

- Led product design across **seven client products** in healthcare, security, creator economy, and enterprise SaaS, partnering with founders, product managers, and engineers from discovery through production handoff.
- Led end-to-end design for N1 Care, an AI clinical intelligence platform, as the sole designer on a 23-person team. Shaped **10 product areas** spanning patient management, clinical records, diagnostics, and clinician-reviewed reports; an internal clinician review reported **75% less analysis and report-generation time**.
- Built N1 Care's **80+ component design system**, defined human-review states and a **28-point AI report quality checklist**, and prototyped **45 clinical data visualizations** in HTML/CSS/SVG and ApexCharts for engineering validation.
- Designed the full Expand Health AI longevity platform, turning wearable, lab, lifestyle, and clinical data into a four-score triage workflow and an interactive prototype used for team and investor reviews.
- Co-led Riskabilitie, an enterprise risk-management SaaS, using stakeholder workshops to define permission-aware workflows, assessment and approval flows, analytics dashboards, and executive reporting.
- Owned product design and front-end engineering for Proposal Buddy, shown publicly as GetPosals, shipping lead management, AI-assisted drafting, approvals, analytics, document sharing, and client delivery in React, TypeScript, and Cloudflare.
- Designed and developed **7+ production Framer websites** for startups and client businesses.

Duggup, Founding Product Designer Bangalore (Remote)

Feb 2023 to Jan 2025

- Led end-to-end product design for Duggup's web and mobile applications as the founding and sole designer, shipping version 1.0 in **five months** and reaching **2,000+ users in the first week**.
- Built a cross-platform design system that **reduced testing and redesign time by 50%** across web and mobile.
- Designed contribution, search, challenge, activity-tracking, and event-purchase flows; tracked daily active users, session length, and retention in Amplitude and ran A/B tests with developers.

Consult Anubhav, UX Designer Vadodara

Jun 2022 to Jun 2023

- Led end-to-end product design for Draftsy, a real-time fantasy sports application for BREN LLC. Conducted structured interviews with four active users and the founder, then designed team drafting, timed turns, auto-pick, league, chat, and retention flows that contributed to a **20% engagement increase**.
- Led a **team of three designers** across concurrent food delivery, logistics, and enterprise survey products, standardizing design review and developer handoff.

EXPERIENCE, CONTINUED

Healthplix Technologies, UX Design Intern

Bangalore (Remote)

Apr 2022 to Jun 2022

- Expanded the Healthplix design system with **26 components and variants**, standardizing product UI and reducing design-to-development handoff time by approximately 20%.
- Designed admin panels and on-site marketing campaign interfaces for internal teams, **reducing campaign launch turnaround time by 33%**.

EDUCATION

SVIT (Gujarat Technological University)

May 2022

Bachelor of Engineering, Mechanical Engineering | Vasad, Gujarat
