Product Designer

Product designer with 5+ years on 0-to-1 products, including two consumer social products I designed from the first screen. Most of my work is the social layer, feeds, profiles, notifications, and the flows that decide whether someone comes back. I own the design system underneath it and prototype in code with Claude and Cursor rather than handing over a static file.

EXPERIENCE

CodeBuddy | Product Designer | Pune

Feb 2025 – May 2026

Product design across seven client products in creator economy, healthcare, security, and enterprise SaaS.

- Sole designer on N1 Care, an AI platform built by a team of 23, across 10 product areas. An internal review measured **75% less analysis and report time**.
- Built its **80+ component design system** on shared tokens, then worked with engineering to implement it in code using Claude Code and the Figma MCP.
- Owned design and front-end engineering for Proposal Buddy, shipping it live in React, TypeScript, and Cloudflare Workers, plus 7+ production Framer sites.

Duggup | Founding Product Designer | Bangalore (Remote)

Feb 2023 – Jan 2025

- Founding and only designer for Duggup web and mobile, a social platform for engineers. Shipped version 1.0 in five months and **2,000+ signed up in the first week**.
- Designed the home feed, customisable profiles, and the question ranking that decided what each person saw first.
- Built the engagement layer around it, including streaks, time-bound challenges, leaderboards, and an activity ticker for what changed since the last visit.
- Built one cross-platform design system rather than two, halving redesign and testing time across web and mobile.
- Shipped on a bi-weekly cadence, tracking daily active users, session length, and retention in Amplitude, and A/B testing the weakest steps with engineering.

Consult Anubhav | UX Designer | Vadodara

Jun 2022 – Jun 2023

- Led design for Draftsy, a real-time fantasy sports app for BREN LLC. Structured interviews with four active players and the founder showed drafts were stalling on timed turns.
- Rebuilt team drafting, timed turns, auto-pick fallback, league creation and joining, in-app chat, and notification settings, tracking where players abandoned the draft rather than only the drafts that finished. Contributed to a **20% engagement increase**.
- Ran a team of three designers across concurrent food delivery, logistics, and enterprise survey products. Part-time from Feb 2023, alongside the founding role at Duggup.

Healthplix Technologies | UX Design Intern | Bangalore (Remote)

Apr 2022 – Jun 2022

- Expanded the design system with 26 components and variants, bringing the product to consistent UI and cutting design-to-development handoff time by roughly 20%.
- Designed the admin panels and on-site campaign interfaces internal teams ran on, reducing campaign launch turnaround by 33%.

Freelance | Product and Brand Designer | Vadodara (Remote)

Mar 2021 – May 2022

- Rebuilt Baroda Public School's learning platform, lifting student interaction **35%** and course completion 20%.

SELECTED BUILDS

Pickle Royale Competitive 2v2 rankings with a custom rating engine. Web, iOS, and Android.

pickleball.dhrumilkherde.com

Passwords Two-team multiplayer word game with real-time rooms and no login.
